WE ARE DISASTER PROVEN

MED SLED® EVACUATION SLEDS

When timing is critical, the Med Sled® evacuation sled is a drag no-lift device that enables 2 people to evacuate a non-ambulatory person out of a single-story building or down the stairwell of a multi-story building. Med Sled® is the trusted evacuating device in over 5,000 facilities nationwide including the top 20 ranked hospitals in the *U.S. News & World Report*.

- + Simple and easy to use
- + Stairwell braking system standard, allows for safe and controlled descents
- + Safely evacuate a person 2-3 times your own weight
- + Patented design provides critical stabilization
- + Decon Capable
- + Can be used with a backboard
- + Holds IV bags, O2 tanks, and other small devices
- + 3 sizes available: Youth, Standard, and Bariatric
- + All sleds rated to 1,000 lbs.

MED SLED® EVACUATION CHAIR

The Med Sled® Evacuation Chair allows for the secure evacuation of non-ambulatory persons from a multi-story building. This lightweight device is ideal for disaster scenarios or when it is unsafe to use an elevator. The rubberized hand grips are designed for ease of use and lifting when necessary. Speed control tracks enable a smooth and safe descent.

- + **Light Weight** ~30lbs / ~13.6kg
- + **Restraint Straps** Color-coded patient control and restraint straps for ultimate security
- + **Supreme Comfort & Support** Designed with patient comfortability and support in mind
- + **Compact Storage** Folding features enable compact storage for minimal footprint in hallways, closets, and stairwells
- + **Accessories** Mounting bracket, storage signs, and dust cover, are included with each evacuation chair

MED SLED® NICU EVACUATION

EVACUATION BASKET WITH O2 EVAC PACK

#MSEB-W/O2EP
 Med Sled® O2 Evac Pack
 Accommodates Size D or E O2 Cylinder

- + Utilized for evacuation of high risk and NICU infants requiring safe, secure and hands-free carrying
- + Allows for high frequency ventilation and medical attention
- + Holds IV bags and life-sustaining equipment
- + No assembly required, lightweight, and decon capable
- + O2 Evac Pack accommodates either size D or E O2 cylinder with regulator or additional medical equipment to transport during an evacuation. Simple to put on (backpack style) - connects directly to basket
- + Holds 100 lbs.

MED SLED® EVACUATION RACK

#MSEB-RACK
Rack – Deployed Dimensions: 38"W x 80"L x 39"H
 Includes (4) IV/Accessory Poles, (2) O2 Holders,
 (1) Rack carry bag

- + No assembly required, easily deploys in less than 1 minute baskets simply slide on and lock securely to the rack
- + Single rack holds six evacuation baskets
- + Eliminates the need to have infant beds at the alternative care site, waist-high for easy accessibility to babies
- + Durable forged aluminum...holds up to 600 lbs.
- + Decon capable

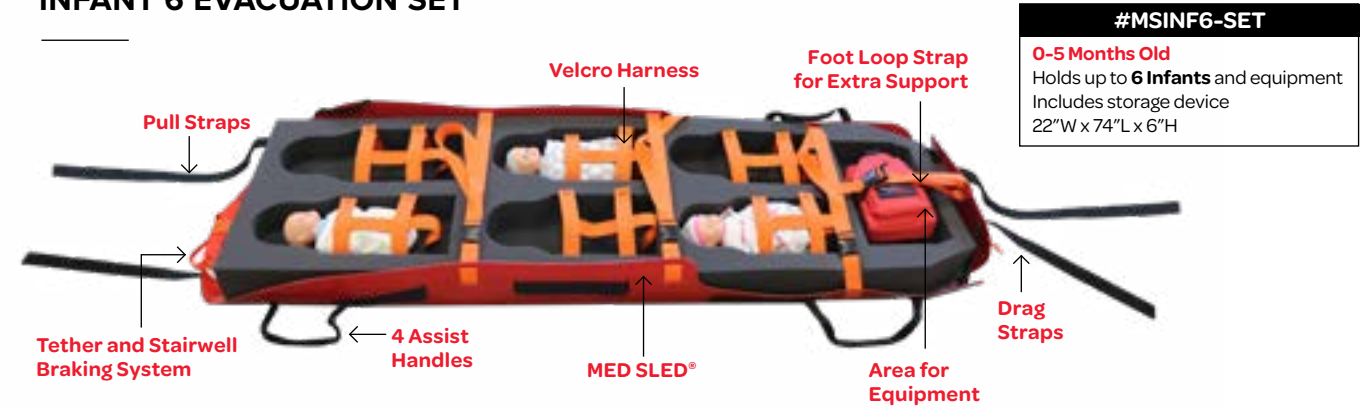

MED SLED® PEDIATRIC EVACUATION

Med Sled® Pediatric Evacuation Sets provide a safe and comfortable solution for evacuating your most delicate patients.

- + Multiple infants or toddlers can be evacuated at one time, eliminating the need to carry every child
- + Evacuation sleds are fully assembled and ready for immediate use
- + Provides an alternative care site until transport arrives

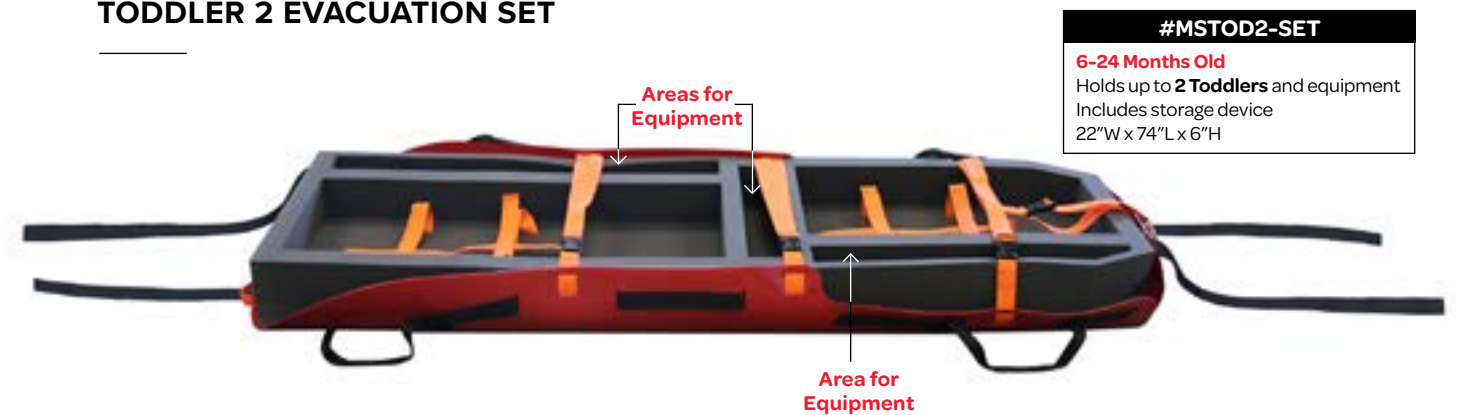

INFANT 6 EVACUATION SET

INFANT 3 EVACUATION SET

TODDLER 2 EVACUATION SET

MED SLED® STORAGE DEVICES

Med Sled® Storage Devices are available in a durable canvas or industrial strength steel. They are ideal for deploying multiple sleds in a single known location or to secure equipment in a public space.

- + Equipped with a front pocket and visible pouch for equipment and unit evac plan
- + Includes wall hook loops for vertical or horizontal installation
- + Includes shoulder strap for convenient transportation

MED SLED® EVACUATION KITS

Med Sled® Emergency Evacuation Kits will increase the safety and speed of your evacuation. Each kit is designed to align critical tools with the responsibilities for each role in the evacuation. The critical roles include Unit Captain, Staff Evacuation, and Staff Stairwell.

#MSEK-SE

STAFF EVACUATION KIT

- + One size fits all high visibility mesh vest
- + Headlamp
- + Leather work gloves whistle
- + Safety goggles
- + Additional items included

#MSEK-SS

STAFF STAIRWELL KIT

- + One size fits all high visibility mesh vest
- + Headlamp
- + Dust mask
- + Glow sticks
- + Safety goggles

#MSEK-AP

AMBULATORY PATIENT EVACUATION KIT

- + One size fits all high visibility mesh vest
- + Headlamp
- + Leather work gloves whistle
- + Safety goggles
- + Additional items included

#MSEK-UC

UNIT CAPTAIN KIT

- + Megaphone
- + Multi-Function LED headlamp dust mask
- + Additional Items included

BLEEDING CONTROL & TRAUMA KITS

BLEEDING CONTROL KIT

TRAMEDIC CABINET KIT

REDFORA® EMERGENCY KITS

We can customize a solution to meet the needs of your organization. For use in healthcare facilities, schools, universities and office buildings.

CUSTOM KIT WITH COMPONENTS

MED SLED® VERTICAL LIFT RESCUE SLEDS

28" AND 36" PLATFORM HIGH ANGLE/VERTICAL LIFT RESCUE SLED

An innovative, cost-effective device designed specifically for both vertical and horizontal rescue operations and confined space. Med Sled® VLR's are offered in a standard configuration, with an optional patient restraint harness, and the VLR system which includes water flotation + tagline kit. All VLR models are available in the 28" or 36" platform.

- + Fast deployment—60 seconds
- + Comes fully assembled and ready to deploy with no rigging necessary
- + Vertical and horizontal lift capability with quick release, patented presto buckles
- + Optional accessories include built-in patient restraint system, flotation system and tagline kit
- + Available in coyote brown, olive drab green and red

MED SLED® VLR ACCESSORIES

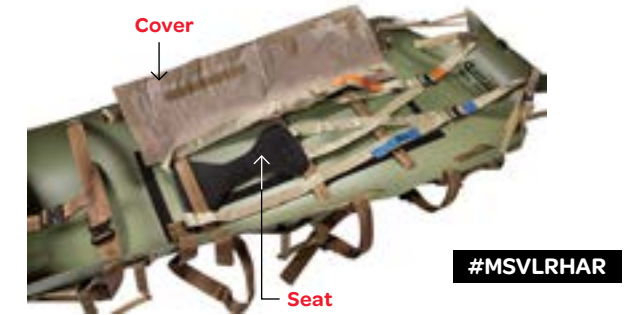

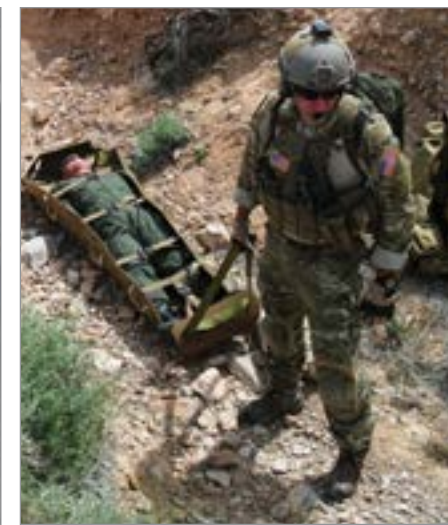

Available for both MS36VLR or MS28VLR

#MSVLRFLS

MED SLED® VERTICAL LIFT RESCUE SLED FLotation SYSTEM

- + (2) Universal flotation logs
- + (1) Chest pad
- + (2) 33 gram CO2 cartridges
- + (1) Set of actuator pins-installed (additional cartridges and pin sets sold separately)

#MSVLRHAR

MED SLED® VERTICAL LIFT RESCUE SLED HARNESS

- + Reduces the effort required to evacuate patients in critical rescue scenarios.
- + Prevents patients from any excess movement within the sled for vertical lift.

#MSVLRTAG250V

MED SLED® VERTICAL LIFT RESCUE TAGLINE KIT

- + 250' of certified 3/8" 9.5 mm nylon w/polypropylene floating waterline, rated at 1600 lbs with tie-knot ends
- + and 9" loops
- + Pkg. of (10) weak links (standard strength 190-225 lbs.)
- + (2) 23kN (5,000 lb.) steel carabiners w/screw lock
- + V-Strap rated at 5000 lbs.

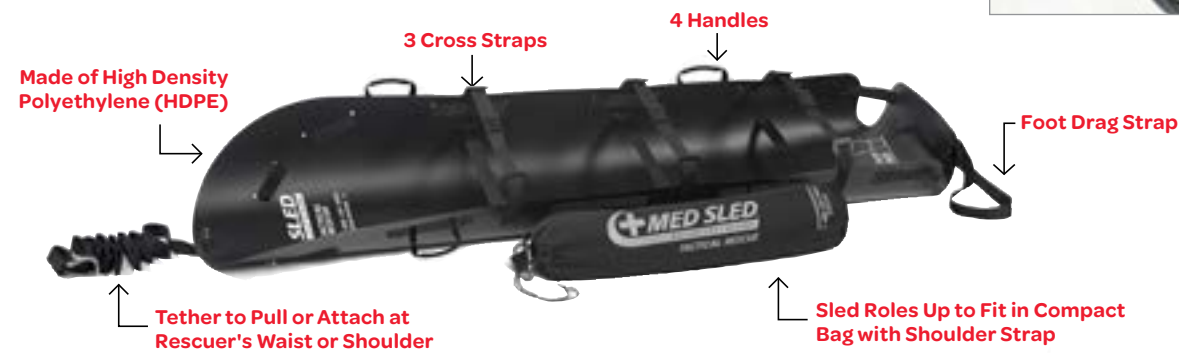

MED SLED® TACTICAL RESCUE

First responders realize there is no standard situation for an emergency evacuation. The Med Sled® Tactical Sled is designed for fast extraction from difficult areas and situations. Not designed for stairwell evacuations. (See page 2 for stairwell evacuation sled.)

TACTICAL SLED

- + Hands-free tether around waist or shoulder allows for carrying equipment or return fire
- + Provides stabilization - can be used with a backboard or stokes
- + Compact - carry bag (30" x 6") with shoulder strap included
- + Lightweight - only 6 lbs!
- + Available in black or red

#MS30 TACTICAL SLED
 Deployed Dimensions: 30"W x 87"L
 Stored Dimensions: 9" dia. x 30"W

MED SLED® DECON & HAZMAT

The Med Sled® Decon/Hazmat device ensures easy movement of a non-ambulatory person through the decon shower process, and safely transports to a cleared zone. Not designed for stairwell evacuations. (See page 2 for stairwell evacuation sled.)

DECON / HAZMAT SLED

- + 100% Fully decon capable
- + Easy to lift onto decon shower rollers
- + Can be used as a two or four-man stretcher expels decon water rapidly
- + Eliminates hard backboards and pinch zones

#MS36DC STANDARD
 Deployed Dimensions: 36"W x 87"L
 Stored Dimensions: 9" dia. x 36"W

MED SLED® EVACUATION ACCESSORIES

MOUNTED WALL SIGNS

- + Hallway, stairwell and storage area wall signage mounted for easy viewing

#MSSH2
5"W x 6"H

WHAT PEOPLE ARE SAYING

"...The Med Sled® was used to evacuate our most critical non-ambulatory patients. Like any hospital in the midst of an evacuation, our main concern was patient and staff safety. Our Med Sleds® were pivotal to our successful overall evacuation strategy during Hurricane Sandy. It is critical to prepare your facility for the worst case scenario."

- Kristin Stevens, Director of Emergency Management, NYU Langone Medical Center, New York, NY

"...The deployed of Med Sleds® were used in evacuating patients through debris-filled hallways, down flights of stairs and out the building to safety. The Med Sled® worked exactly as designed, allowing healthcare providers to evacuate non-ambulatory patients when time was critical."

- Charles Copple, Battalion Chief, Joplin Fire Department, Joplin, MO
